

## Educare®

Designed especially for secondary academic institutions, the **Educare® Fume Cupboard** offers an economical and practical choice for any customer wanting a constant air volume (CAV) fume cupboard that fits into a busy teaching environment. The Educare® model is built to the same high-quality standards as other Aircare fume cupboards.

Additionally, there are design options offered for the Educare® fume cupboard that can be useful both to schools and to other customers. Several options are illustrated on this page.

The Educare® Fume Cupboard fully complies with AS/NZS 2243.8 (2006) standards.

### Option 1 – Fitted into a Wall Penetration

This DS Educare® fume cupboard, fitted into a wall penetration, permits set up of an experiment or process from another room, while the sash on the other side is locked closed.

At the proper time, the front sash can be opened, and the work can be begun or resumed by the person on this side of the fume cupboard.

This unit is designed so only one sash can open at a time. Whether teacher and students, or employees with different tasks, Aircare's Double-Sided option is a great convenience.

### Option 2 – Wall Installation

This Educare® fume cupboard, installed along a wall, allows excellent viewing for observers because of its Side Windows feature.

### Option 3 – Freestanding Installation

This Educare® fume cupboard, meant for a free-standing installation in the middle of a room, provides the ultimate in visibility. Even with several people working at the fume cupboard, the view is unimpeded for anyone else in the room.

Option 1

Option 2

Option 3

### The economical choice for many schools:

- ▶ Constant air volume (CAV)
- ▶ Conveniently sized for smaller work areas
- ▶ Optional Double-Sided (DS) models
- ▶ Optional Side Windows
- ▶ Optional Wrap-Around Glass.

## Educare® Details

Dimensions for the Single-Sided Educare® fume cupboard are shown below on the left. For the Double-Sided Educare®, the wall opening required for such an installation is shown below on the right.
